

**Kills
germs, viruses
and bacteria**

That's right - *Swordfish Ultra Violet Air Treatment System* deactivates all mold, fungi, viruses and bacteria that grow in household HVAC systems!

Most indoor air quality products merely trap or filter pollutants, but the powerful Swordfish truly purifies your air, destroying the microorganisms that can cause colds, flu, allergies and respiratory discomfort.

Swordfish is powered by a dedicated electronic ballast, specially engineered by Allanson to provide better function and longer life with less power usage. Placed either above

the cooling coil or in the return-air duct, this high-tech unit is especially easy to maintain with a lamp output monitor and replacement indicator. Available in various strengths; Swordfish is compact, lightweight and easy to install.

**Swordfish by Allanson:
Leading the challenge for healthier indoor living.**

swordfish™

ULTRA VIOLET AIR TREATMENT SYSTEM

Input: 120 Volts, 60 Hz

Model	Lamp Length	Output Watts	Order Replacement Lamp
UVA18W	9"	18W	UVA18WLR
UVA36W	16"	36W	UVA36WLR
UVA60W	16"	60W	UVA60WLR

Swordfish can be mounted in your duct above the cooling coil and it will bathe the coil in UVC light, preventing growth of bacteria and mold, which could otherwise be released into the household breathing air. This location will give you a 99% kill rate.

As an alternative, it can be mounted on your return air duct (downstream of your air filter) where Swordfish UV energy kills airborne pathogens passing the lamp.

Allanson recommends that you combine this system with an air filter (MERV 8 rated) giving you a more powerful effect on those microorganisms traveling through and growing in your ducts.

Features and Benefits of Swordfish:

- Provides clean, healthy indoor air by killing germs, viruses and bacteria.
- UV lamp produces NO ozone.
- Safety features prevent lamp from lighting unless correctly mounted to duct, preventing accidental contact with UV.
- Monitors input power to indicate SAFE operation.
- Swordfish is powered by an Allanson electronic ballast.
- Monitors the lamp UV output and identifies when it requires replacement.
- Installation is quick, easy and safe.

Air Duct Mounted Accessory Classified by Underwriters Laboratories, Inc. with respect to electric shock, fire and casualty hazards only. The health aspects associated with the use of this product and its ability to aid in the disinfection of environmental air have not been investigated by U.L.
