

58MSA

# Gas Furnace

90.0% AFUE CONDENSING GAS FURNACE

# Improve your overall comfort with Carrier's 58MSA gas furnace.

performance

With the 58MSA condensing gas furnace, Carrier delivers the energy efficiency, proven reliability and custom made performance that homeowners expect from the leader in the indoor weather industry. When it comes to your family's comfort, you want more than status quo. That's why Carrier offers the 58MSA condensing gas furnace.

efficiency

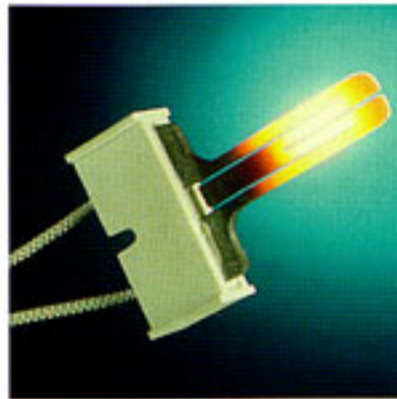

Designed to deliver comfort, reliability and efficiency, the 58MSA can help you save up to 30% in heating costs. Offering 90.0% AFUE (Annual Fuel Utilization Efficiency), the 58MSA offers substantial savings over older furnaces. The excellent fuel economy of the 58MSA makes this furnace the perfect choice for families concerned with money savings and conserving the world's natural resources.

reliability

Designed, built and tested by the leader in the indoor weather industry, the 58MSA delivers customized comfort year after year. The S-shaped heat exchanger transfers about 80% of the useable heat from the fuel into your home. Then, the flow-through condensing heat exchanger extracts nearly all of the remaining heat from the fuel so that you can realize the full economic, reliability and comfort benefits of the 58MSA. Both of these heat exchangers are built with corrosion-resistant materials for long-lasting performance. The hot surface ignitor adds to the reliability of the furnace because the ignitor will not clog, flutter or blow out. With Carrier's 58MSA condensing gas furnace, you can depend on years of reliable performance and custom made indoor weather.

technology

- 1 Reliable, energy-efficient start-up** is a result of the hot surface ignition system. This system delivers efficiency and reliability well beyond the levels achieved using a pilot light system.
- 2 Energy-efficient performance** of the 58MSA comes from Carrier's exclusive S-shaped heat exchanger. This component transfers about 80% of all useable heat from furnace operation into your home. The aluminized steel construction provides long-lasting durability.
- 3 Enhanced efficiency and reliability** is provided by the flow-through condensing heat exchanger that follows the S-shaped heat exchanger. This component removes nearly all of the remaining heat from the fuel so you can enjoy the full benefits of the economic operation of the 58MSA. Carrier's Serpentuff™ thermoplastic coating extends the life of this component for rugged durability.

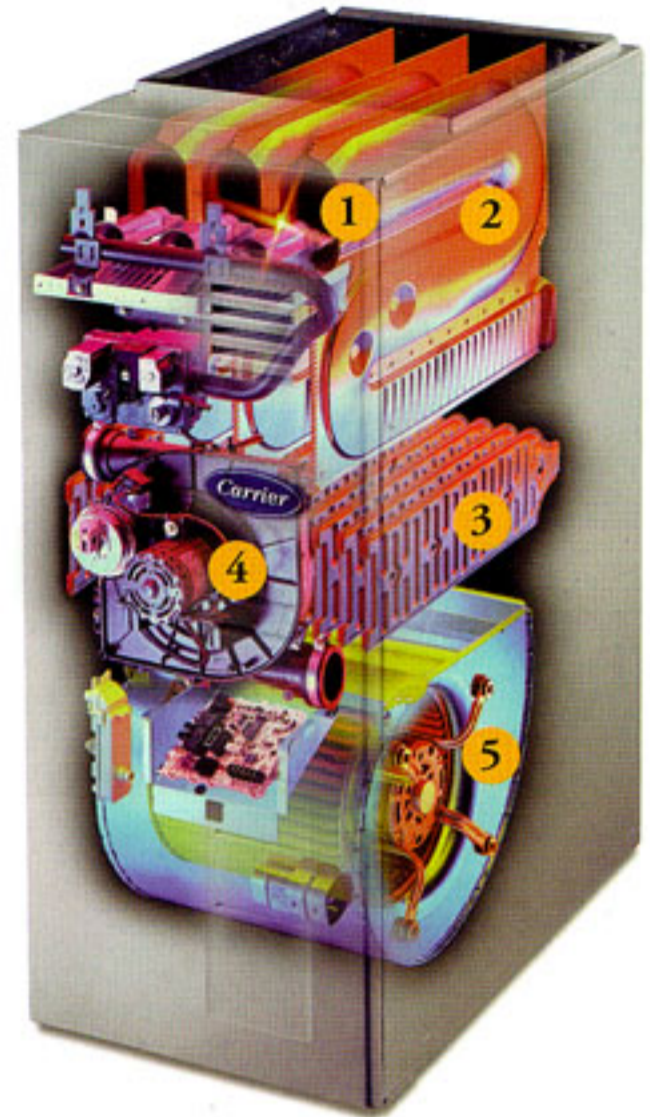

The hot surface ignition system ignites gas more efficiently and reliably, saving fuel typically wasted by a continuous pilot system.

Horizontal installation

- 4 Quiet, draft-free comfort** is provided by the rubber isolated inducer fan motor which precisely regulates the amount of air needed for combustion.
- 5 Consistent comfort** is ensured by the steady airflow of the blower.

## WARRANTY

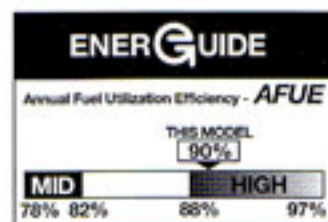

Carrier's confidence in our products is backed by written component and product warranties. Both heat exchangers are backed by a 20-year limited warranty. The entire unit is backed by a one-year limited warranty. Ask your indoor weather expert for details.

As an ENERGY STAR Partner™ Carrier Corporation has determined that this product meets the ENERGY STAR guidelines for energy efficiency.

CUSTOM MADE INDOOR WEATHER™

Always look for these symbols, the home heating industry seals of certified performance, efficiency and capacity.
