Goodman Manufacturing Company, L.P. • 1501 Seamist • Houston, Texas 77008 • 713-861-2500

Designed for the comfort of you and your family

Features or Necessities?

Most manufacturers refer to these as features and include them only in their most expensive units. We call them necessities and put them in every unit. *Because of this devotion to quality we have achieved the lowest failure rate in our industry.*

G-90 Galvanized Steel Cabinet with appliance quality, baked on Powder Paint gives durable protection and attractive appearance.

Totally Enclosed Condenser Fan Motor is permanently lubricated - the best in the business.

Quiet Operating Top Discharge Fan with precision designed and balanced blades.

Custom Rifle Bored Copper Tubing increases efficiency.

Safety Grill protects the coil.

Lanced Aluminum Fins are thinner and more numerous for maximum heat dissipation.

Factory Installed Liquid Line Filter Dryer keeps the refrigerant system clean for longer life.

Elevated Base Pan protects the unit from rust.

Sweat and Forget Brass Service Valves for easy service and leak free operation.

Heat Pump Necessities:

- Bi-Flow liquid line filter dryer
- Muffler
- Suction line accumulator
- Reversing valve energizes on cooling
- Low pressure controls

Affordable • Energy Efficient • Naturally Quieter • Dependable • Durable • Improved Performance • Maximum Cooling Comfort • Season After Season • Remarkably Reliable • Money Saving • Attractive Durable Powder Paint Finish • Rust Resistant Screws • Quality • *And It's Made in the USA.*

"We couldn't believe our new comfort system could cut our electric bills so drastically."

The Comfort System...

In this day of energy conservation and cost consciousness, it's nice to know there's still an economical way to invest in a comfort system. Whether you're buying a system for your home or office, you'll enjoy high efficiency energy saving comfort, exceptional value and a fair return of your investment.

Our various lines of air conditioning comfort systems are equipped with larger condenser surfaces and with efficiently matched indoor components, resulting in lower utility bills and a longer life for your system.

If you're looking for a heat pump to deliver maximum performance while lowering your utility bill, look no further.

A heat pump is an air conditioner in the summer and simply reverses itself to provide heat in the winter.

We believe in keeping things simple and serviceable, while assuring the highest quality and value. An air conditioning system must serve a long, useful service life. We take extra effort to ensure that our units are easy to maintain and in the design of a most serviceable product to assure you of long lasting comfort.

Your local dealer can help you, through experience and knowledge, to decide on the right comfort system for your home or office. We all share the same goal, to provide you with the highest quality system at a most economical price.

Air Conditioners & Heat Pumps

All units are manufactured under the strictest quality guidelines and with only the best parts and materials. Each unit is run and tested eleven times before it leaves our factory. We use copper tubing in the coil instead of aluminum, because copper doesn't corrode... aluminum does.

Electric Air Handlers

Our Air Handlers set a new standard for installation simplicity. They use the same basic materials as the furnaces so you'll get the same long life and reliability.

Gas Furnaces

A Gas Furnace must serve a long, useful service life. We take extra effort to assure that our furnaces are easy to maintain in terms of filter maintenance and in the design of a most serviceable product to assure you of long lasting comfort.

Evaporator Coils

The indoor Evaporator Coil shares the cooling burden with your system's outdoor Condensing Unit to keep you cool and dry. An old or mismatched coil can rob you of the performance you expect and need.

THE "BEST" TECHNOLOGY HAS TO OFFER. PROVIDES YOU WITH THE MOST ECONOMICAL, EFFICIENT COMFORT SYSTEM POSSIBLE

5 Year LIMITED **Warranty**
All Parts • All Products

Every part in every unit we make is guaranteed for at least 5 years, subject to the conditions described in the product warranty. Heat exchangers are guaranteed for at least 20 years. This is the strongest warranty in the industry and shows our commitment to deliver you the highest possible quality.

**The #1 warranty
in the industry**

All of our units are designed and manufactured with the same high quality standards regardless of size or efficiency. Our designs are unique because they virtually eliminate the most frequent causes of product failure. They are simple to service and forgiving to operate. We use the highest quality materials and components available because if a part fails then the unit fails. Finally, every unit is run tested before it leaves the factory.

That's why we know ...

There's No Better Quality.

**The industry's fastest
growing major manufacturer**

Goodman Manufacturing produces a complete line of residential and commercial air conditioning and heating equipment at its modern, high technology factory in Houston, Texas. The equipment is sold through a nationwide network of independent distributors and installers who are dedicated to uphold the company's high standards of quality. The philosophy is simple: Be the highest quality, lowest cost producer of heating and air conditioning equipment in the United States. Is it successful? Goodman's share of market has grown faster than any other major manufacturer.

Quality and Value speak for themselves.

Your local, dependable dealer can help you select the system that's right for your home or office. We share a common goal; that is to provide you with the most economical, efficient system for your comfort.
