

Nothing To Sneeze At.

You can't see most of the things you breathe in your home – all the tiny bits of pollen, spores, bacteria and more. But when you or a loved one starts sneezing or coughing you're reminded that they're there. The fact is, the one inch furnace filter you're currently using does almost nothing to stop these nasty particles.

But you can clean the air up to five times more efficiently. A Honeywell Media Air Cleaner traps over 99% of whole pollen and plant spores, providing you with a healthier environment to live and breathe in.

What's more, a Media Air Cleaner helps to keep your furniture, draperies and carpeting cleaner by removing dust and smoke particles. And using a Media Air Cleaner makes economic sense by offering a more efficient way to run your heating and cooling equipment. It helps prevent dirty particles from accumulating on the indoor heating and cooling coil and diminishing its ability to transfer heating or cooling.

Do something nice for your family and your home. Have your heating and cooling dealer install a Honeywell Media Air Cleaner and breathe easily.

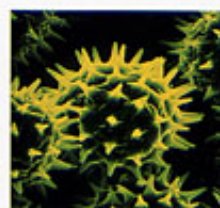

Get a Honeywell Media Air Cleaner and this is what you'll be missing.

House dust mite
60-40 microns

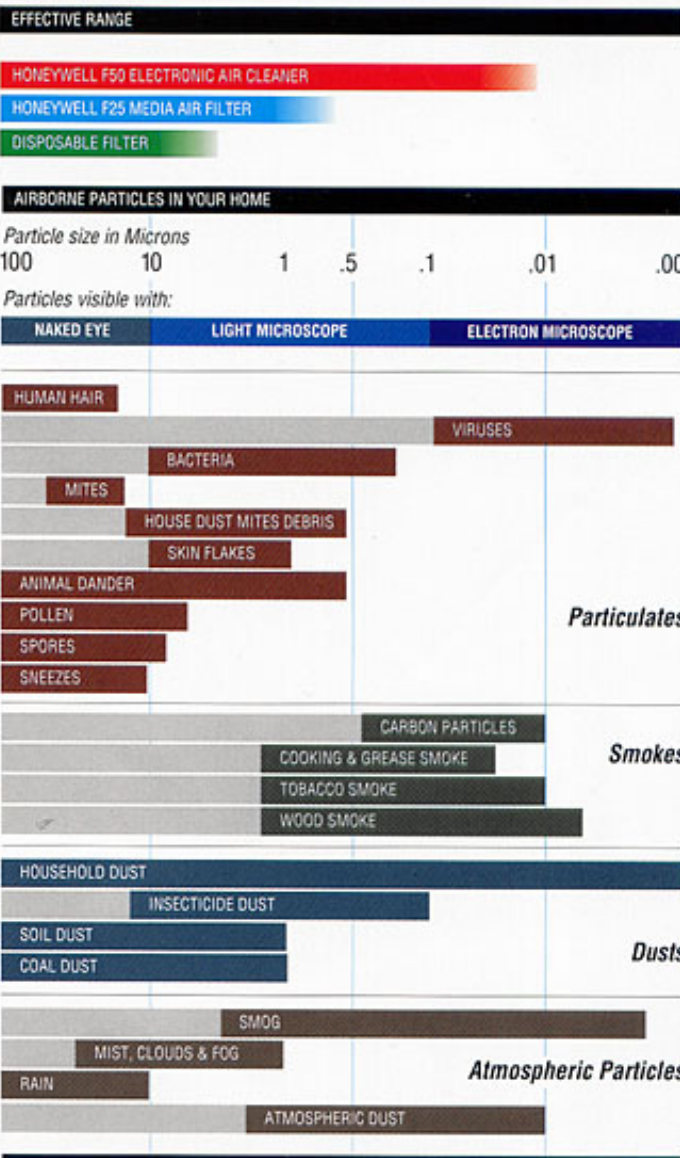

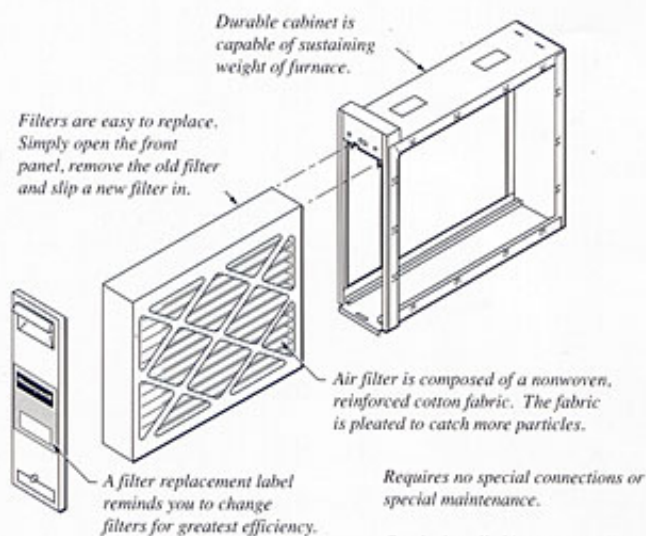

Animal dander
100-5 microns

Pollen
100-5 microns

Your furnace or air conditioner comes with a 1-inch filter to keep large particles of dust from accumulating inside the equipment. This "equipment" filter was never intended to be a means of keeping the air you breathe clean and healthy.

To get clean air to breathe you need a more efficient filter. The Honeywell Media Air Cleaner offers an effective, affordable solution to your indoor air problems.

Sizes to fit any size equipment:

Model	Duct Size	Airflow Rating	Replacement Cartridge No.
F25F1000	16" x 25"	1400 CFM	203719
F25F1018	20" x 20"	1400 CFM	203721
F25F1026	20" x 25"	1"	
F25F1034	20" x 12.5"
