You Can Feel The Difference.

Perfect Fit™ Air Cleaners

## INDOOR AIR QUALITY IS AN ISSUE IN EVERY HOME.

We know the indoor air quality of your home is important to you. And, interestingly enough, the air inside your home is usually more polluted than the air outside. And, that means millions of unwanted airborne particles are being inhaled by you and your family. Particles like pollen, dust, bacteria, tobacco smoke, cooking smoke, and animal hair and dander keep your indoor air from being as clean – and healthy – as it could be. Also, if anyone in your family suffers from asthma or allergies, the quality of the air in your home is even more important.

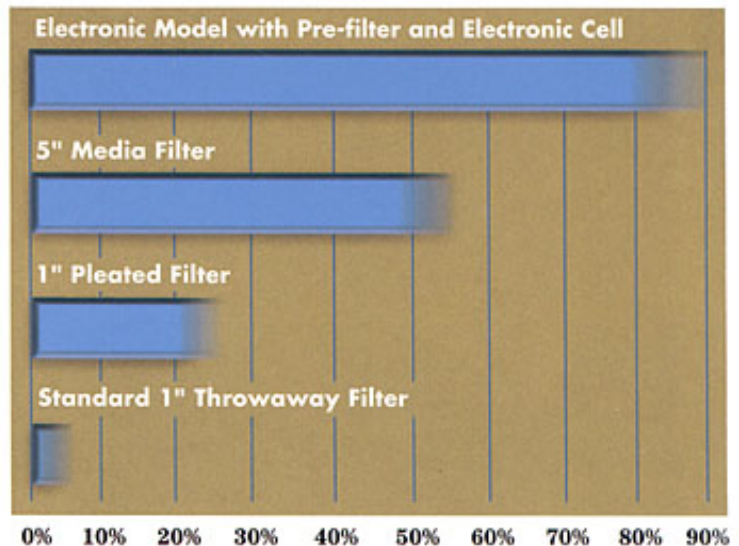

## A TRANE PERFECT FIT AIR CLEANER IS THE ANSWER.

A Trane Perfect Fit air cleaner is an integral part of a Trane home comfort system. And, it's easily upgradable, with three filtration options, including the higher efficiency electronic model. When considering which filter is appropriate for your home, consider your lifestyle. How much time and money are you willing to spend on replacing filters? Would you prefer to have a filter you can clean yourself? And, what kind of effectiveness are you looking for? For help with these and other questions, read on.

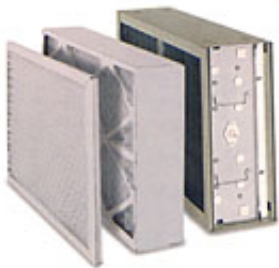

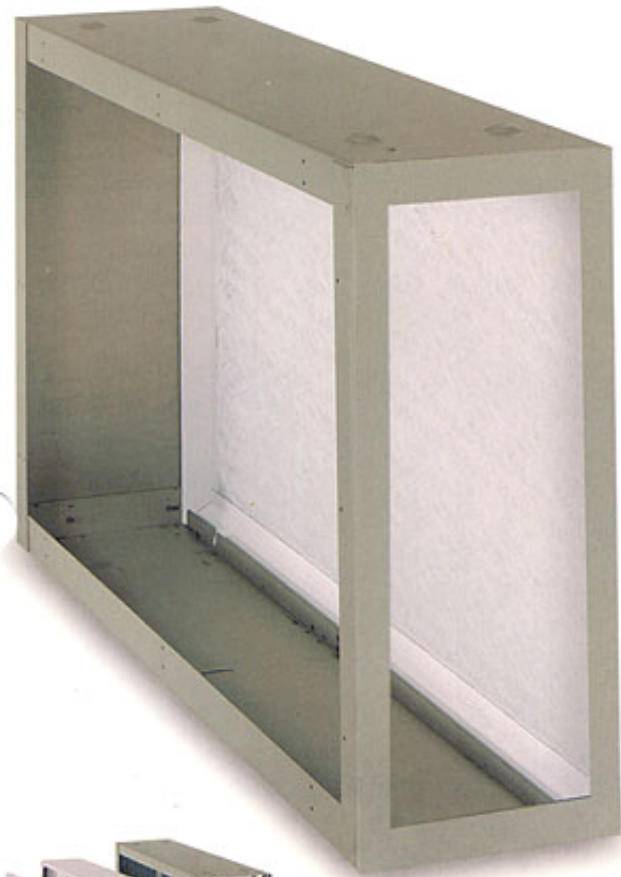

Adding a Trane air cleaner to your central air conditioning and heating system can make an enormous difference in the indoor air quality of your home. And, it helps keep it clean too, while using less energy than a 40-watt bulb.

## FILTER EFFECTIVENESS RATIOS<sup>1</sup>

<sup>1</sup>Ability to capture and retain suspended particles in the air.

## THREE FILTRATION OPTIONS FOR EVERY AIR QUALITY NEED.

One cabinet, three filtration options. If you start out with a pleated or media filter, you can easily upgrade to an electronic model. Other than a simple door change and cell insert, the cabinet remains the same. And, regardless of the filter you choose, the Perfect Fit air cleaner is easy to access and maintain.

### 1. BEST: ELECTRONIC MODEL WITH PRE-FILTER AND ELECTRONIC CELL

- Up to 40 times more effective than a standard throwaway filter
- Electronic cell can be easily washed
- Up to 99%<sup>2</sup> efficient at removing airborne particles
- Protects the operating efficiency of your home comfort system
- Keeps your furniture, carpets and drapes cleaner
- Filters 100% of the air

### 2. GOOD: 5" MEDIA FILTER

- Up to 15 times more effective than a standard throwaway filter
- Easy to replace
- Helps maintain the operating efficiency of your home comfort system
- Easily upgraded to a Trane Electronic Air Cleaner at any time
- Filters 100% of the air

### 3. BASIC: 1" PLEATED FILTER

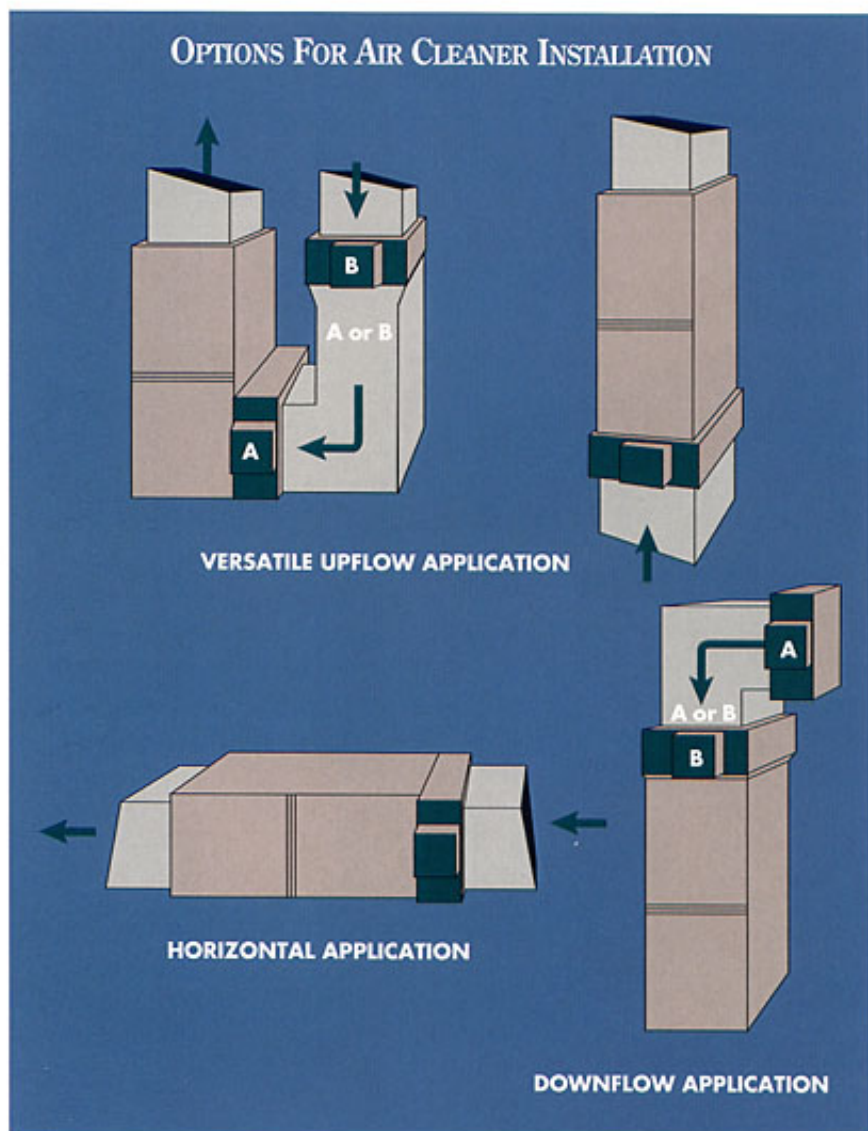

- Up to 6 times more effective than a standard throwaway filter
- Easy to replace
- Filters 100% of the air

<sup>2</sup>Based on ASHRAE Atmospheric Dust Spot Efficiency Test.

## WHATEVER THE APPLICATION, TRANE'S THE PERFECT FIT.

A Trane air cleaner is not only attractive, but it's designed to fit in with the Trane system family with its matching finish. It's also flexible. It can be mounted horizontally, vertically, at the top or at the bottom, depending on the installation requirements. Unlike some air cleaners, it's designed to fit in tight spaces, and in difficult applications. And, it's available in a variety of sizes, ensuring a perfect fit with any of Trane's furnace or air handler cabinet widths.

And, here's something else. A Trane Perfect Fit™ air cleaner is durably made with heavy duty latches and Air-Tite™ construction for long life and continued reliability. And, it's easily accessed from the front making it easy to service and maintain.
